

Christina has built a solid foundation in the aviation industry over the past decade. Starting as a flight attendant for American Airlines, she found her passion for flight, which motivated her to pursue a pilot career beginning in 2022. With over 1,000 hours she has achieved the necessary ratings up through the Certificated Flight Instructor (CFI) and by first quarter 2025 Certificated Flight Instructor Instrument (CFII). She is also an integral part of the ECA sales team, working closely with the clients and sourcing aircraft that meet their needs. This has allowed Christina to gain vast knowledge about make and model specific airframes, powerplants, and “old school” avionics. She is extremely well versed in the “modern” avionics space and is constantly working with the manufacturers as well as sales/tech support in order to be as current as possible with the ever-changing avionics options. Her commitment to continuous learning and adaptation reflects her dedication to staying current in the evolving aviation field.
